PARTICIPANT AT 3RD DUBROVNIK TALKS MEDITERRANEAN FORUM OCT 28, 2019

PARTICIPANT AT 4TH DUBROVNIK TALKS MEDITERRANEAN FORUM MAY 19, 2020

EXPERIENCE | **OPTIKA BEGIĆ WEBSITE** OPTIKABEGIC.COM

My first step into web development and my first published project was the website for Optika Begić. Optika Begić is an optical business located in Ilijaš, Bosnia and Herzegovina. The website was built utilizing WordPress technologies during freshman year at University Sarajevo School of Science and Technology.

ZAJAFON WEBSITE

ZAJAFON.COM

The website for Zajafon Store was my second publication. Zajafon is a phone retail store in Ilijaš and Breza. The customer requested a straightforward website that would represent the company, its offers and location. The website was built utilizing WordPress technologies during freshman year at University Sarajevo School of Science and Technology.

SOFT SKILLS ACADEMY SARAJEVO

19-20 DEC 2020

Soft Skills Academy Sarajevo is a three-day workshop in Sarajevo for students of all faculties that encourages students to build informal skills essential for employment and successful career, as well as for the problems of modern living that traditional education cannot supply. Certified EESTED Soft Skills Trainers from all around Europe conduct the trainings.

ATLANTBH DEV DAYS WORKSHOP

22-23 FEB 2021

Atlantbh DevDays is a two-day Web App Development Workshop carried out by Atlantbh. The workshop's purpose is to provide participants with the opportunity to work on a real-world project and apply what they have learned. Third place award was handed to me and my team.

DIGITAL CITY CHALLENGE

24 OCT 2020

The Digital City Challenge is part of the Dubrovnik Talks Mediterranean Forum, which is held at the University Sarajevo School of Science and Technology. Me, along with four of my colleagues, came up with the concept of digitizing Bosnia and Herzegovina transportation system. Digitalized Transportation System is a project designed to improve the current transport system in the city. The proposed solution would automate the transport system, eliminate the illegal activities of certain customers and streamline the process of supplementing the ticket.

VISITBOSNIA PROJECT

28 MAY 2021

VisitBosnia is a full stack Web Application that me, alongside with two of my colleagues made as the final project for three subjects, Databases, Design and Implementation in Web Development and Cloud Computing. Application is made using HTML, CSS, JavaScript, PHP and MySQL. The idea of a project is to make travel through Bosnia easier for both tourists and locals. The aim is to consolidate all tourist attractions, restaurants, fast foods, hotels and other businesses together in one place so that people can conveniently navigate around the city. Every place added to the website will contain thorough description and details such as its location, cost, web site, phone number, and so on. The Application is not live yet, but it can be seen on my GitHub.

AWARDS | Annual Certificate of Outstanding Academic Achievement with GPA of 9.5 issued by University Sarajevo School of Science and Technology

Certificate for completing Soft Skills Academy Sarajevo issued by EESTEC

Certificate for completing Python Course issued by Udemy

Certificate for completing Full Stack Web Development Boot camp issued by Udemy

Award for participating at Digital City Challenge with an awesome idea
